# WITH STEARN YOU CAN BUY WITH CONFIDENCE

## OUR WARRANTY BACK UP IS YOUR ASSURANCE:

### PRODUCT WARRANTY

#### Large Domestic Appliances:

Laundry, Refrigeration, Dishwashers, Cooking Appliances etc.

The manufacturers' warranty period is one year, unless otherwise stated.

The customer should refer to the manufacturer using the contact number stated who will undertake all genuine in-warranty repairs.

The manufacturer or the manufacturers' nominated service agent will carry out these repairs free of charge.

Warranty does not include damage, misuse or abuse of a product. It is recommended that you always work through the manufacturers' trouble shooting guides before requesting a service call out as if the fault is not identified as a manufacturing fault, there may be a charge made.

Please Note! Calling out manufacturers' service engineers to an appliance that has been damaged, misused or abused is not a free service, call-out and repair charges will apply.

### COMMERCIAL USE OR COMMERCIAL PREMISES:

Occasionally, staff at the manufacturers call centres may advise that in-warranty repairs are invalid for domestic products in commercial use, i.e. schools, offices, hospitals etc. However, domestic appliances used in a domestic way on commercial premises are covered; therefore please ask to speak to a supervisor to resolve any issue immediately. If you are still unable to resolve the issue, please obtain the name of the person refusing warranty service, contact your local Stearn centre with the details and they will intercede on your behalf.

Please Note! If you choose to use a domestic appliance for a purpose where a commercial machine is clearly required, then the domestic warranty will be invalidated.

# iKOOL® Evaporative Coolers

These stand alone, quiet and reliable units are a great alternative to a fan cooler.

Ideal during the warm summer months, they provide a cost effective, efficient and reliable cooling solution for homes and small offices alike.

- Large tank capacity for longer cooling time
- High efficiency pad that cools 30% more than conventional pads
- Powerful air flow for faster cooling and comfort
- Automatic louvers for better air distribution
- Multi directional wheels move effortlessly
- Reliable - Quiet - Efficient - Portable

Also known as Swamp Coolers or Spot Coolers, MasterKool Air Coolers simply use the process of evaporation to create a cool environment, without the need for an expensive air conditioning system. They are simple to use, portable and cheap to run.

## LUX AIR® Mobile Air Conditioning Systems

Our high performance portable air conditioners feature heat pump technology\*, enabling units to both heat and cool at the push of a button. Fitted with easy-roll castors they can be conveniently moved from room to room as required. A ducted exhaust hose is included to vent the hot air to the outside of the building. An adjustable window mounting panel is also supplied to attach the exhaust hose for ease of use. Our portable air conditioning units benefit from an automatic inbuilt water wheel, and can condense the water out with the exhaust air whilst in cool mode, so there is generally no need to empty the water tank (except in extremely humid conditions).

Maintain the ideal environment around your home throughout the year

## Dehumidifiers

A dehumidifier removes the excess moisture that we create on a daily basis through activities such as running baths, showers, cooking and drying laundry. All of which could lead to condensation, damp and mould that can damage your home and health. A dehumidifier can help maintain a more constant level of humidity and alleviate these conditions. The higher the extraction rate, the more condensation will be controlled.

Revolutionary technology, only from Acctim. Use your existing USB charger to create a multi-purpose power hub. Charge your phone, tablet or other USB device directly from your Acctim Smart Connector® clock.

The quieter the clock, the more you can hear. Acctim sweep clocks feature a non-ticking sweep movement seconds hand. Functional, as well as delivering a suave sophistication.

All Acctim Radio Controlled clocks are tuned to the UK's Atomic Clock transmitter. Featuring fully automatic set-up and adjustment to summer / winter time changes.

Acctim calendar clocks give an easy reminder of the date and day of the week. Available in digital or analogue.
